Summary of Concerns

Main Concerns

- Future enrollment projections
- Existing boundaries do not coincide with feeder schools
- Existing boundary divisions do not follow natural dividers

**Schools impacted by these concerns:
JLHS, MPHS and WOHS**

- 2. Options**
3. Proposed Boundary Changes
4. Next Steps
5. Questions and Answers

Options

- 1. No boundary changes and no expanded or additional facilities (other than those underway)**
- 2. No boundary changes, expand existing facilities and/or build an additional facility nearby**
- 3. Boundary changes**

All of these solutions have implications

Options and Implications

1. **No boundary changes and no expanded or additional facilities (other than those underway)**

Results in Overcrowding

- a. **Larger number of students in many classes**
 - *Not conducive to learning environment*
 - *Safety issues*
 - *Legal implications*
 - *Insufficient parking*
- b. **Perhaps Double Sessions**
 - *Requires double staff*
 - *Contractual issues with ESTA and CSEA*
 - *Possible bankruptcy of ESUHSD*
- c. **Facilities are not used optimally**

Options and Implications

2. No boundary changes, expand existing facilities and/or build an additional facility nearby

a. Construction of additional facilities

- *Sufficient local funding for an additional facility is not available.*
- *District wide surplus capacity makes ESUHSD ineligible for state funding of new facilities.*
- *Not an immediate solution. New buildings would be ready in 4-6 years. (land, design, permits, construction, etc.)*

Options and Implications

- 3. Proposed boundary changes will result in:**
 - a. Adequate student enrollment in each school**
 - b. Improving safe access where feasible within capacities**
 - c. All currently enrolled students and incoming 9th graders, for the following school year, may remain in their present school until graduation (Grandfathering)**

ESUHSD believes this is the most viable option

Next Steps

These meetings are intended to inform the community.

- 1. This is a starting point.**
- 2. We need the public's input and recommendations to make this work for all of us.**
- 3. Any additional solutions are welcome and will be considered, within the district's ability to do so.**
