Welcome to James Lick High School's 2016-2017 school year. Students graduating from James Lick will be successful in college and in their careers, by gaining skills related to: agency, communication, collaboration, and growth mindset. Students will also have the opportunity to experience a new curriculum, based on Common Core State Standards, through a project based approach to teaching. Students will be engaged and encouraged to become independent, thinking citizens of a new connected and rapidly changing world, and understand how to solve problems over rote memorization.

James Lick High School (JLHS) cherishes the dedication of its parent/guardian volunteers and all adult encouragement of students’ academic, social and extracurricular activities. Their continued support of the students, staff and programs is what separates JLHS from all other schools.

Key Programs and Magnets

**Bilingual Certification:** James Lick has a strong tradition of preparing for Silicon Valley Success in multiple languages. Students who build upon their existing fluency in Vietnamese and Spanish can earn certification.

**AP:** JLHS offers 13 AP courses for the 10th-12th grade students in areas including the Arts, Mathematics, World Languages, English, Psychology, Economics and the Sciences.

**Partners with CAL-SOAP:** Working with the California Student Opportunity and Access Program (one of the premier college readiness organizations), enables us to support our students in college entrance and financial aid.

**Member of the New Tech Network:**

JLHS is a member of an internationally recognized program designed to empower students with the knowledge and skills sought out by universities and employers.

- Join an internationally recognized program in a small school community committed to the success of your student.
- Interdisciplinary, project-based classrooms develop the knowledge and skills employers and universities want most.
- Small class sizes, one-to-one laptops and individualized attention are used to empower your student with the focus and tools for Silicon Valley success.
- College and career planning during high school prepare your student to enter and complete a 2 or 4-year college or university.
