ENROLLMENT: 2,250

GRADUATION RATE: 95.5%

A-G COMPLETION RATE: 46.2%

Welcome to Santa Teresa High School's 2016-2017 school year. New students are about to experience learning and growing in a safe, but exciting academic and social environment. Returning students have a key role to play in welcoming those who are new to ST. You also have the opportunity to experience a more relevant curriculum, based on Common Core State Standards, that emphasizes understanding how to solve math problems instead of rote memorization and other subjects that will engage and encourage you to become independent, thinking citizens of our new connected and rapidly changing world.

Santa Teresa High School (STHS) cherishes the dedication of our parent/guardian volunteers and all adult encouragement of our students' academic, social, and extracurricular activities. Your continued support of our students and our school is what separates ST from all other schools.

- Students can participate in a variety of extra-curricular activities, including intramural and regional competitive sports, performing arts and more than 30 clubs and activities.
- With the intention of decreasing student academic stress and increasing student's opportunity for learning, Santa Teresa High School adopted a four day block schedule with a three day a week Advisory/Tutorial period.
- Students are active members of the school community who are encouraged to advocate for themselves and their peers.

Key Programs and Magnets

Multimedia: STHS is a multimedia magnet school. Students take four years of multimedia courses focusing on Adobe Creative Suite software tools, graphic design, digital video and music production.

AP: STHS offers 19 AP courses for 10th-12th grade students.

Quicksilver Program (QuIP): STHS launched the Quicksilver Innovation Program (QuIP) as our small learning community for some of our incoming 9th grade students. This program consists of English 1, Integrated Math 1, and Biology. What makes this program exciting and unique is its emphasis on project-based, cross-curricular learning, which will empower our students by engaging them in real world experiences that have a direct impact on their community. During the 2016-2017 school year, we are launching our 10th grade year for QuIP.

American Sign Language: In addition, to Spanish, French, and Vietnamese, STHS is proud to offer American Sign Language (ASL 1, ASL 2, ASL 3, and ASL 4) as A-G approved World Language courses.

Preparing every student to thrive in a global society.
