Engineering Academy
Yerba Buena High School

Highlights a strong academic core curriculum that integrates the theoretical principles of science and mathematics with the practical applications of industrial technology. Features exploratory topics in architectural, mechanical, electrical, structural, and civil engineering. Students also learn BJM design using Autodesk software and other 3D modeling software. Classroom and labs are located in a modern, well-equipped facility, equipped with real-world materials, instruments, and software allowing student to develop problem-solving and team-building skills.
