Typical exteriors at Independence

Classrooms at Yerba Buena

HVAC + Roof Replacement Completed

Completed the roof replacement and installation of new HVAC package units at Oak Grove, Building U.

Safety & Security

Video surveillance upgrades at all campuses out to bid.

Plans and specifications for installation of safety and security cameras at East Side High Schools have been completed. Work will include mounting and power and data connections for over one hundred security cameras.

This project provides the campus with digital imaging and recording. The system uses video cameras installed throughout the campus, including the hallways of selected classroom buildings. The images collected by these cameras are stored in digital video recorders (DVR's). School or District office personnel can view the stored images using their computer workstations. An Alarm Monitoring Center can view stored images in real time, an enhancement to our current alarm systems.

Solicitation of competitive bids from installation contractors is in progress.

Outdoor Athletic Fields

Track and Field Upgrades @ James Lick, Oak Grove & Yerba Buena

Construction is well underway on track and field upgrades at James Lick, Oak Grove, and Yerba Buena. When completed, all three sites will have new all weather, state of the art athletic fields including new bleachers.

At Mount Pleasant High School, where track and field upgrades were completed earlier this year, work to install new bleachers is underway.

Track & Field sitework well underway at James Lick, Oak Grove, & Yerba Buena.
